

# UNT Transportation and Its Partners: Working to Keep Passengers and Riders Safe

## **Bike Share**

**From our partners at Vevo, operating on campus and the City of Denton**

Vevo is wiping down the areas of the bikes riders typically touch such as handlebars, brake levers, bells, locks, and seats every time a bike is rebalanced or deployed. We recommended customers wash their hands or use hand sanitizer after riding.

## **Buses**

**From our partners at Denton County Transportation Authority, operating all UNT buses**

Along with daily cleanings, we are using a medical-grade disinfecting spray on all DCTA buses, trains and Downtown Denton Transit Center (DDTC). Additional attention is being placed on high touch point areas such as door handles, countertops and steering wheels; and we continue to evaluate our cleaning processes as needed.

## **Car Share**

**From our partners at Zipcar, operating on campus and the City of Denton**

The safety of the Zipcar community is our top priority. That's especially true as concerns around the coronavirus (COVID-19) evolve. We're proud to help you reach the places you'd like to go— today and every day. With that in mind, we've taken new measures to promote maximum cleanliness of our vehicles. We upgraded our car-cleaning with antiviral and antimicrobial solutions and have deployed incremental sanitizing procedures. We've also promoted additional healthy hygiene and safety practices within the team that works behind the scenes to care for our vehicles.

## **E-Ride**

**Operated by UNT Transportation Services**

Each shuttle is disinfected thoroughly prior to going into service each evening, paying particular attention to sanitizing areas most likely to be touched including sanitizing door handles, seats, and railings.

## **Rideshare**

**Operated by Lyft**

Our focus is on keeping our riders, drivers and team members safe. We have an internal task force dedicated solely to this issue, and are prepared to take action as needed. Lyft has been in touch with drivers to make sure they have the latest guidance from the CDC on how to best protect themselves.

We encourage all riders and drivers to wash their hands or use hand sanitizer often. To help facilitate these best practices, we've partnered with EO Products, makers of [Everyone](#) to distribute more than 200,000 bottles of hand sanitizer and other cleaning supplies to drivers at Driver Hub and Service Center locations, at no cost to them. These will be ready for pick up in the coming days and we will alert drivers when they are available in their city.

## **Valet -- Service temporarily suspended**

**From our partners at PSA, operating valet service at Union Circle**

We are supplying all locations with gloves and we have hand sanitizer at the check-in/checkout area. As always our staff are instructed to wash hands as often as possible.
